STRUCON CONSULTING PRIVATE LIMITED

What We Still Need From You

The remaining items required to take the new website live. Content only — no engineering work is outstanding.

PREPARED BY	DOCUMENT	DATE	PREVIEW
Shaurya Sharma	STR-WEB-2026-03A	10 November 2026	strucon.vercel.app

01 · HOW TO USE THIS

Two things to send, in two groups

The website is built. What remains is **files to send** (section 02) and **three questions to answer** (section 03). Everything listed here is marked **"TBD"** on the live preview, so you can see exactly where each item appears before you gather it.

A running list is also kept at `strucon.vercel.app/review`.

> THE FIVE THAT BLOCK LAUNCH
>
> **Logo · project photographs · team headshots · client logos · the enquiry inbox address.** If only these five arrive, the site can go live; everything else can follow afterwards without holding up the launch.

02 · FILES TO SEND

Photographs, artwork and documents

Send by email or a shared drive link. Please name files so we can tell what they belong to (for example `baga-cement-erection-01.jpg`).

	ITEM	PRIORITY	SPECIFICATION
☐	**Company logo**	**Critical**	Vector `.svg`, or `.png` at 1000px+ wide with a transparent background. Plus a white/reverse version for dark backgrounds. *You noted this was attached, but no logo file arrived — the site is still showing a temporary mark.*
☐	**Project photographs**	**Critical**	3–5 per project across the ten case studies: site photographs, erection shots, model screenshots. Seven images were received and are already in use; the rest of the projects have none.
☐	**Team headshots**	**Critical**	Four images — Owais Ahmad, Rukhsada Khatoon, Yasir Ali, Mohammad Shaheem. Head-and-shoulders, plain background, consistent style across all four.
☐	**Client logos**	**Critical**	Image files for the seven named clients. Transparent `.png` or `.svg`. Only logos you have permission to display.
☐	**Homepage video**	High	10–20 seconds, no sound, no captions, under about 3 MB. Steel erection, a plant, or a model walkthrough. A photograph is currently standing in.
☐	**Company profile PDF**	High	The “Download Company Profile” button currently has no file behind it.
☐	**Service photographs**	High	One per service across the eight service pages.
☐	**Industry photographs**	High	One per sector across the ten industry pages.
☐	**Office photographs**	Medium	Your office, workstations, the team at work — used on the About page.

Written content

	ITEM	PRIORITY	WHAT IS NEEDED
☐	**Enquiry inbox**	**Critical**	The enquiry forms work but do not yet deliver to anyone. Confirm the single address that should receive website enquiries.
☐	**Director biographies**	High	40–60 words each for **Owais Ahmad**, **Rukhsada Khatoon** and **Yasir Ali**. Mohammad Shaheem’s is already live. LinkedIn profile links are optional but add credibility.
☐	**Client testimonials**	High	Three quotes. Each needs the quote itself, the person’s name, their job title, their company, and written permission to publish it.
☐	**Project narratives**	Medium	Kochi, Nagarjuna, Sharjah, NOM and JSW currently show scope and tonnage but no story. Three or four sentences each — the problem, what STRUCON did, the outcome — would bring them up to the standard of the other five.
☐	**Unconfirmed client names**	Medium	Samsung Engineering, Technip, Siemens, Engineers India Limited, Holtec, Alstom, Lanco and Holcim were listed as “potential” organisations, so they are **not** on the site. Confirm which are genuine clients we may name.

Accounts and access

	ITEM	PRIORITY	WHAT IS NEEDED
☐	**Google Analytics**	High	A GA4 measurement ID, so you can see visitor and enquiry numbers from the day you launch.
☐	**Google Search Console**	High	Access, so the new pages are submitted and indexed rather than waiting to be found.

03 · QUESTIONS TO ANSWER

Three points only you can settle

Each of these would be noticed by a client who checks, so we have not guessed at any of them.

1. Were you founded in 2003 or 2008?

Your form gives **2008**, and the site shows that. But your own company story says *"Since 2003…"* and your approved Terms of Use says *"established in early 2003"*. The site therefore reads 2008 in one place and 2003 in two others.

Our suggestion: "Operating since 2003, incorporated in 2008" — accurate on both counts, and it lets you claim the longer track record honestly. Reply "agreed" and we will apply it.

2. Which CIN is correct?

Your two forms gave different numbers:

- `U24319HR2008PTC037858`
- `U74140HR2008PTC037858` ← currently published

Company number, state and year match; only the activity code differs. We used the second because `74140` denotes consultancy while `24319` denotes chemical manufacturing. One is a typing error, and an incorrect CIN in the footer is a compliance matter.

3. Your Privacy Policy is missing section 12

The approved text runs from section 11 directly to section 13. We have published it exactly as you supplied it and have not renumbered anything. Please check whether a clause was lost in copying.

04 · NEXT

What happens when these arrive

- We apply your content and **remove every TBD marker** from the site.
- We connect the enquiry forms to your inbox and switch on Analytics and Search Console.

- We redirect each old web address to its new equivalent, so existing links and search rankings carry across instead of breaking.
- We point **strucon.net** at the new site and submit the sitemap to Google.

If anything here is unclear, or it would be quicker to work through it on a call, we are happy to do that.
