Requirements & Assets Checklist

PREPARED BY	DOCUMENT	DATE
Shaurya Sharma	STR-DOC-02	10 November 2026

Strucon Website — Requirements & Assets Checklist

> **Purpose:** This is the single source of truth for everything I need **from you** to build the Strucon website (~25 pages, Next.js App Router + Tailwind). I can build the full structure, layout, components, placeholder copy, and AI-image *prompts* without any of this — but the site can't go **live and convert leads** until the ⚠️ **BLOCKING** items are supplied.
>
> **How to use it:** Skim the "Priority Legend", then fill in / attach items section by section. You don't need everything at once — I've mapped each item to the build **Stage** it's needed for. Anything you don't provide, I'll fill with a realistic, clearly-labeled placeholder so the site is fully functional and you can swap assets later.

✅ Confirmed Decisions (from you)

DECISION	ANSWER
Branding	Use existing **strucon.net** logo + colors as reference.
Homepage hero	**Video** background. *(I still need the video file/URL + poster frame — see 2.1.)*
CMS	**Simple built-in** (Markdown/JSON in repo + lightweight admin).
Content	Pull from **strucon.net**; use labeled placeholders where the site has nothing.

📥 Data Pulled from strucon.net (verified — please confirm/correct)

- **Legal name:** STRUCON Consulting Pvt. Ltd. — Indian consulting firm, **founded early 2003**, **ISO 9001:2008**.
- **Logo:** `http://strucon.net/wp-content/uploads/2019/05/logo.png` *(low-res; please send a high-res/SVG version — see 1.1).*
- **Tagline:** "Design & Detailing of Industrial & Commercial Structures."
- **Real capabilities:** ~1000 MT/month steel detailing; **6 lac+ MT** detailed to date; **34 Tekla** users, **6 AutoCAD** users; experience in **Indian, American & European** steel detailing standards.

- **Services (live site):** Engineering Consultation, Civil & Structural Drawing, Civil & Structural Design, 3D Modeling, Structural Steel Detailing, Architectural Design, Mechanical Design, E&I, Process Design, Project Management.
- **Industries (live site):** Power, Cement, Lime, Refinery, Petrochemical, Commercial/Residential, Chemical, Fertilizer, Steel Plants, Heavy & Medium Engineering.
- **Contact:** Corp office — 801-802, 8th Fl, Astralis Tower, Supertech Supernova, Sector 94, Noida, UP 201301 · Reg office — B-Wing, 1st Fl, A55/12, DLF Phase-1, Gurgaon, HR 122002 · **Phone** 91-120-4740796 · **Email** info@strucon.net · **LinkedIn** linkedin.com/company/28026403.

⚠️ Mismatches between your brief and the live site — need your call

ITEM	YOUR BRIEF	LIVE SITE (STRUCON.NET)	I'LL USE…
Stats bar	26+ Years, 500+ Projects, 100+ Engineers, 20 Countries	Founded 2003 (~23 yrs), 6 lac+ MT, 34+40 staff, ISO 9001:2008	**Your brief's numbers** as placeholders — ⚠️ **confirm the real figures**, they must be accurate & legally safe.
Services	8 (Structural, Steel Detailing, BIM, Civil, Mechanical, Process, Electrical, PM)	10 (incl. Architectural, 3D Modeling, E&I, Engineering Consultation)	**Your brief's 8** for the homepage grid; note extras exist. Confirm the final 8.
ISO version	"ISO Processes"	ISO **9001:2008** (now superseded by 9001:2015)	Confirm whether you're now **ISO 9001:2015** certified before I print it.
Client logos / testimonials	Needed for Trust sections	**None found** on live site	Placeholder logos until you supply real, rights-cleared ones.
Brand colors	—	Logo present but **no hex codes extractable** from markup	I'll **sample the palette from the logo** + propose an AECOM-grade system for your approval.

Priority Legend

TAG	MEANING
⚠️ **BLOCKING**	I need a decision here before I can build that stage correctly.
🔴 **Go-live**	Not needed to *build*, but the site can't launch publicly without it (real content, legal, integrations).
🟡 **Nice-to-have**	Improves quality/conversion; I'll use a placeholder until provided.
🟢 **I'll handle**	I will generate this (placeholder copy, AI-image prompts, schema, etc.) — no action needed from you.

1. Brand & Visual Identity — *needed Stage 1*

#	ITEM	PRIORITY	NOTES
1.1	**Logo files** — primary, white/reverse, and mark-only (favicon) versions	⚠️ BLOCKING*	SVG preferred; PNG w/ transparent bg acceptable. *If none exists, I'll design a clean wordmark placeholder.*
1.2	**Brand colors** (hex) — primary, secondary, accent	⚠️ BLOCKING*	*If none, I'll propose a palette (see the question I'm asking you below).*
1.3	**Brand fonts** — any licensed/required typefaces	🟡	If none, I'll pair Google Fonts (self-hosted for performance).
1.4	**Brand guidelines / style guide PDF** (if one exists)	🟡	Ensures I match existing collateral.
1.5	**Tagline / positioning line** (beyond "Engineering Tomorrow's Infrastructure")	🟡	Used in footer, meta, social cards.
1.6	**Tone reference** — confirm AECOM-style (corporate, authoritative, technical) is right	🟢 /confirm	Default = yes, mirror AECOM tone & structure.

2. Photography & Video — *needed Stage 1 (hero) → all stages*

> **Your instruction:** avoid generic stock office photos. I will provide an **AI image-generation prompt + placeholder description** for every hero/section slot (🟢 I'll handle), so you can generate or source finals independently. Below is what I need **from you** *if you have real assets*.

#	SLOT	PRIORITY	WHAT I NEED
2.1	**Homepage hero** — full-width image **or video** background	⚠️ decision	Image or video? If video: file/URL + poster frame. Theme: steel structure / refinery / BIM overlay.
2.2	Service page heroes (×8)	🟡	1 image each, or I'll supply AI prompts.
2.3	Industry tile/hero images (×8: Power, Steel, Oil & Gas, Petrochemical, Mining, Infrastructure, Warehousing, Industrial Buildings)	🟡	Real project photos strongly preferred for credibility.
2.4	**Project / case-study images** (per project + gallery)	🔴 Go-live	These sell the work — real photos/renders matter most here.
2.5	Leadership & team headshots	🔴 Go-live	Consistent crop/background ideal.
2.6	BIM/model screenshots (Tekla, Revit, etc.)	🟡	Great for Services/Blog authenticity.
2.7	Office/facility ("Infrastructure" section of About) photos	🟡	
2.8	Client logos (for "Trusted By" strip)	🔴 Go-live	SVG/PNG, transparent bg. **Confirm you have rights to display each.**

Image spec I'll target: WebP/AVIF, responsive `next/image`, lazy-loaded below the fold, LCP hero preloaded.

---

3. Company Content & Copy — *staged*

> 🟢 I will write realistic placeholder copy for everything so the site reads well immediately. To make it **true and go-live ready**, I need the real versions of these:

3.1 Core facts — 🔴 Go-live

- ☐ Confirm the **stats**: 26+ Years, 500+ Projects, 100+ Engineers, 20 Countries — accurate? As of what year?
- ☐ Company legal name, year founded, HQ location, registration/GST/CIN (for footer + schema).
- ☐ Certifications & standards actually held (ISO 9001? 45001? AISC? which codes: AISC, Eurocode, IS, AS/NZS, BS?).

3.2 About / Leadership — 🔴 Go-live

- ☐ Company story / history (2–4 paragraphs).
- ☐ Mission & Vision statements.
- ☐ Leadership: names, titles, bios, headshots, LinkedIn URLs.
- ☐ Infrastructure / Technology / Quality narrative (I'll draft; confirm specifics).

3.3 Services (×8) — 🟡 (I'll draft; confirm/correct)

For each: Structural Engineering, Steel Detailing, BIM, Civil, Mechanical, Process, Electrical, Project Management —

- ☐ Any specific **software** you use per service (e.g., Tekla Structures, STAAD.Pro, Revit, SAP2000, SDS/2, AutoCAD, Navisworks, E3D/PDMS...).
- ☐ Specific **deliverables** per service (GA drawings, fabrication drawings, BOMs, connection design calcs, clash reports...).
- ☐ Any differentiators/certifications specific to a service.

3.4 Projects / Case Studies — 🔴 Go-live

For each flagship project (aim for **6–10** to start):

- ☐ Client (or "confidential"), Location, Industry, project scale (tonnage/MW/etc.).
- ☐ Challenge → Solution → Results (metrics: time saved, tonnage detailed, RFIs reduced...).
- ☐ Software used + gallery images.
- ☐ **NDA check:** which clients/projects can be named publicly?

3.5 Testimonials / Clients — 🟡

- ☐ Client quotes (name, title, company, photo/logo) — huge for trust.
- ☐ Full client list for the "Clients" page.

3.6 Blog seed posts (×3) — 🟢 I'll draft, you approve

Topics from your list: BIM, Tekla, Industrial Design, Power Plants, Steel Structures, Engineering Outsourcing.

- ☐ Confirm author name(s)/byline + any technical claims you want made/avoided.

3.7 Careers — 🔴 Go-live for real listings

- ☐ Real open positions (title, location, type, description) — or should the list pull from your ATS?
- ☐ Culture & benefits copy (I'll draft).
- ☐ Where should applications go? (email inbox / ATS / Google Form / stored in CMS?)

---

4. Contact & Company Data — *needed Stage 6 (Contact page)* — 🔴 Go-live

- ☐ Office address(es) — all locations for the Contact page + "Global Presence" map.
- ☐ Phone number(s) (with country codes).
- ☐ **WhatsApp** business number (for the WhatsApp deep link).
- ☐ **LinkedIn** company URL (+ any other socials: X, YouTube, Instagram).
- ☐ Primary contact email(s) — general, sales/RFP, careers.
- ☐ **Google Maps** — exact pin location(s) / place name for the embed.
- ☐ Business hours (for LocalBusiness schema).

5. CMS / Admin Panel — ⚠️ BLOCKING decision (affects scaffold in Stage 1)

You asked for a CMS so non-technical staff can edit Projects, Blog, Team, Clients, Services, Careers. I need you to pick a direction (I'm asking this as a formal question below):

- **Option A — Sanity** (recommended): free tier, great DX, hosted Studio, live preview, image CDN.
- **Option B — Contentful:** enterprise-friendly, generous free tier.
- **Option C — WordPress REST API (headless):** if staff already know WordPress.
- **Option D — Simple built-in:** Markdown/JSON files in the repo + a lightweight admin — cheapest, but "editing" still touches the repo.

I'll structure all content-fetching behind a typed data layer so we can switch providers later with minimal churn.

---

6. Forms, Lead Gen & Integrations — *needed Stage 6*

I'll build reusable, validated forms (React Hook Form + Zod) for each CTA and wire them to a **placeholder Next.js API route** you connect later. To make them live I need:

#	ITEM	PRIORITY	NOTES
6.1	**Email delivery** — which provider? (Resend / SendGrid / SMTP / Nodemailer) + destination inbox	🔴 Go-live	Resend recommended for Next.js.
6.2	**CRM** integration? (HubSpot / Zoho / Salesforce / none)	🟡	If yes, I'll shape payloads for it.
6.3	**File upload** destination for "Upload Tender Documents" (S3 / UploadThing / email attachment / CMS) + max size & allowed types	⚠️ decision	Affects form architecture. Default: UploadThing/S3, PDF/DWG/ZIP ≤ 25 MB.
6.4	**Spam protection** — reCAPTCHA v3 / hCaptcha / Cloudflare Turnstile keys	🟡	Turnstile recommended (free, privacy-friendly).
6.5	**"Download Company Profile"** — do you have the PDF, or gate it behind the form?	🔴 Go-live	Need the PDF file + whether it's gated (email-first).
6.6	**"Book Engineering Review" / "Schedule Consultation"** — calendar tool? (Calendly / Cal.com / just a form)	🟡	If Calendly, share the link to embed.

CTA field mapping (my proposed defaults — tell me to change):

- *Schedule Consultation:* name, company, email, phone, service interest, message, preferred date.
- *Request Proposal:* + project type, industry, scope, timeline, budget range.
- *Upload Tender Documents:* + file upload, tender deadline.
- *Download Company Profile:* name, email, company (email-gated download).
- *Book Engineering Review:* name, company, email, discipline, drawing/model attachment (optional).

7. SEO, Analytics & Domain — *needed Stage 6*

- ☐ **Domain name** (for canonical URLs, sitemap, robots, schema). 🔴
- ☐ **Google Analytics / GA4** measurement ID + **Google Search Console** (I'll add tags). 🟡
- ☐ Confirm target keywords (I have your list — good). Any priority markets/countries for geo-targeting? 🟡
- ☐ Social share image (Open Graph / Twitter card) — or I'll generate a branded default. 🟢
- 🟢 I'll handle: meta titles/descriptions per page, semantic headings, `sitemap.xml`, `robots.txt`, JSON-LD schema (Organization + LocalBusiness + Article + BreadcrumbList + Service).

---

8. Legal — *needed Stage 6* — 🔴 Go-live

- ☐ **Privacy Policy** & **Terms** — do you have legal-approved text, or should I draft standard templates for **your lawyer to review**? (I'll draft placeholders; do **not** treat my draft as legal advice.)
- ☐ Cookie consent needed? (Depends on analytics + target regions — GDPR/EU?)

---

9. Hosting & Technical — *needed at deploy*

- ☐ **Deployment target** — Vercel (recommended for Next.js), Netlify, or your own infra? 🟡
- ☐ Existing **GitHub/GitLab** repo, or should I structure it for you to push? 🟡
- ☐ Any existing site to migrate content/redirects from? (301 map) 🟡
- ☐ Node version / package manager preference (default: Node 20+, pnpm). 🟢

---

10. What I'll Proceed With as Defaults (unless you say otherwise)

So I'm not blocked, here's what I'll assume for Stage 1 if you don't specify:

1. **Design system:** AECOM-inspired — deep industrial navy/charcoal base, structural-steel accent (safety-orange or a confident blue), generous whitespace, strong grid, technical sans + humanist sans pairing. *(I'll propose exact hex + fonts before coding.)*
2. **Content:** realistic, industry-accurate **placeholder** copy, clearly swappable.
3. **Images:** AI-generation **prompts + descriptive placeholders** in every slot (no generic office stock).
4. **CMS:** structure the data layer for **Sanity**, but keep it swappable.
5. **Forms:** RHF + Zod → placeholder `/api` routes, Resend-shaped payloads.
6. **Hosting:** optimized for **Vercel**, Node 20, pnpm, `next/image`, App Router, RSC.

---

11. Open Questions (also asked interactively)

1. Do you have a **logo + brand colors**, or should I design the palette from scratch?

2. **Homepage hero:** image or video background?
3. **CMS choice:** Sanity / Contentful / WordPress / simple built-in?
4. Build now with **placeholder content**, or wait for your real copy/assets first?
5. Any hard **NDA constraints** on naming clients/projects publicly?
6. Primary **target market/geography** for SEO (India / Middle East / global EPC)?

I'll keep this file updated as items are confirmed. Items marked 🟢 need nothing from you.
